Haemophilia A is an uncommon bleeding disorder but it represents an important cause of disability and expenditure of health care resources. There is no agreement on its optimal management. The aim of this study was to evaluate our own experience in a haemophilia centre over the years. A retrospective analysis was carried out on all consecutive patients who started the long-term prophylaxis with recombinant activated factor VII (rFVIIa, NovoSeven) from January 2002 to December 2009. The median age at start of the prophylaxis was 4.5 years (range, 1-15 years). In all, 37 patients, from five to 20 years of age, were treated with rFVIIa. In nine cases, the treatment was started during the acute bleeding, in 11 cases in the chronic phase of the disease and in 17 cases in the stabilisation phase. Thirteen patients received rFVIIa alone (group A), 22 patients required a combination therapy, eight patients received a bypassing treatment with a low molecular weight heparin (group B) and two patients were bridged with cryoprecipitate (group C). The median treatment time was 657 days (range, 5-3,529 days). Haemorrhagic events occurred in three patients treated with rFVIIa alone, in three patients of group B and in none of the patients

Do you need some help with image processing? Do you often create duplicate images for your projects? AVScan can be your right assistant! AVScan is a helpful image processing tool developed specifically for scanning image material and for creating copies. In addition to scanners, AVScan is able to handle images from digital cameras and mobile phones as well. AVScan offers you unlimited scan batches, with unlimited copies and unlimited image formats. You can edit scans in any way you need, such as contrast, brightness and color adjustments and even apply sharpening, different filters and even noise removals. Scanned images are capable of being displayed in thumbnails, sent to FTP servers, copied and even split or merged into multiple batches. All the tasks that you can perform with AVScan are performed at the most efficient speeds and are made easy and simple for you. AVScan has a long list of features that can provide you with the required image editing and sharing, letting you work with or share images of any format and from your supported devices, no matter if they are from AVVision or other manufacturers, AVScan can help you with the difficult tasks. Specific features: 1. Multiple scan batches processing AVScan's multiple batches scanning function lets you take control of an unlimited number of images from your scanner or digital camera. Once your scan batch is finished, the program can begin to process the next batch instantly, improving your workflow even faster. This is an extremely helpful feature to have in your arsenal, since you can create as many batches of images as you would like, regardless of their size. 2. Unlimited copies AVScan has no limits on copies that you can make from your scan batch. The program will create as many copies as are needed, letting you save extra processing time and reduce the level of effort needed from your side. 3. Unlimited image formats AVScan's image processing features allow you to be completely satisfied and free from constraints or limitations. All the most common image formats are supported, including TIFF, JPG, BMP and many more. 4. Fast speeds AVScan provides the fastest processing speeds ever seen in such a program. You do not need to wait for a timeout or any other time limit when processing, all the batches are done in the fastest possible time. 5. Drag-and-drop support AVScan can upload and delete images from your hard drive to and from FTP servers with drag-and-drop actions, letting you save time and do not have to pick

What's New In?

USB Document Scanner with high scan speed and a large scanning area! It's almost certainly true that everyone has found themselves searching for an awesome tool to help them more effectively complete projects at work, gain more money, find a new job or simply fit a few more hours in to their already packed schedules, and, in all these cases, the quality of the scanning solution plays a crucial role. This is why so many people keep buying different models of AVISIO D1 or D3 scanners every time they require one for a particular purpose, but all the efforts to find out which one is the best are usually more an exercise in frustration, rather than any real help. All that really needs to be done is to find out whether the AVISION D1 is the best scanner to work with for a particular purpose, because this is precisely the situation to consider the AVISION D1. If you are looking for a fast and easy-to-use scanner that doesn't cost the earth, then the AVISION D1 is the best scanner to work with for multiple tasks. It just takes one look at the AVISION D1 to see that it has been designed for all kinds of situations, so there will be no surprises if you find yourself using it for scanning a range of materials. The AVISION D1 scans with a very high scan speed, so you won't have to worry about handling large paper documents at a slower speed, nor will you have to worry about finding the best settings when working with textured materials, like those with pictures on. You can save documents that have been scanned, while also batch processing them in bulk so that it will be easy for you to sort and manipulate the images you have just created. With a 16 megapixel resolution, you can expect to be able to create much higher quality pictures of your material, than you could before, and the supplied software makes it easy for you to optimize the quality and layout of your documents. The D1 scanner is so easy to use that the instructions are written with the help of pictures, so there is nothing to worry about when you go through the manual, you'll find all the information you need very quickly. If you have to scan a number of books and magazines, you will be able to do that with the AVISION D1, as it has a large scanning area, which means you will be able to scan everything while also making sure that none of the document
