I have a problem where I have to check the "true/false" value of a certain value, and if that value equals "true", then I have to check a few values inside a Boolean function: What I really want to do is add an "if" statement that would determine whether or not I would add 1 into the "a" variable. Can someone give me an idea of how to implement this? Thank you for the help! A: In this case use: if (a === true){ //do stuff } Where you are comparing a against a value of true. Three-year-old Jalen White had cancer and died. As we type these words, Jalen's smile still haunts us and we thank God for your special gift of love and kindness to children. We know that other agencies are looking to fill this role. We recognize the need for a foster parent like you. We can help this little boy right now and make an impact on his life.
