Fitness Tracker 1.1.6.2

Fitness Tracker has been created as one of the best lightweight, simple, no-nonsense health tracker programs available. It fits in nicely as a desktop gadget, allowing you to monitor your daily activities and create an action plan that will help you achieve your fitness goals. It can be used on almost any system as well as mobile devices such as iPhone, iPad, iPad Mini.

MeterRing 3.7.0

MeterRing is the ideal choice for all you who want to save data and money. It can show you the consumption, costs and the savings of electricity, gas, water and any other energy usage. Many utilities allow you to monitor your energy usage, so we decided to include this as well. What makes MeterRing unique is the possibility to compare the costs and savings, by simply entering a ZIP code.

MLive 4.5.2

MLive Mobile is the popular companion app that provides users with all of the features of the website on their smartphone or tablet. It includes all the most popular features of the website including breaking news, music, sports, opinion, funny, movies and more! And, it's FREE!

FLY Live Wallpapers

MLive Live Wallpapers bring the best of MLive.com to your home screen, providing you with all of the news, music, opinion and more right on your mobile device. *****

The Bat! Professional Edition Activation

Have you ever wondered how to protect your privacy and secure your personal or business correspondence from prying eyes? Now you don't have to. The Bat! Professional Edition provides the best security and total privacy in handling your confidential information. Find what is interesting about your correspondence without being discovered yourself! Features

Quadrant Security The Bat! is a multi-layered email application supporting strong security measures, including hardware authentication, security token support, and on-the-fly email encryption. **Biometrics** Let it your finger or your face - the Bat! accepts any kind of fingerprint or eye print without a password or other user IDs. **Automatic**

IMAP/POP3 Account Management The Bat! extracts IMAP/POP3 accounts from your email provider and safely stores them in an encrypted archive. **Enhanced Security & Privacy** Strong encryption is always on, and no one can find out what you are typing. Advanced security tokens protect account passwords, and biometric authentication protects your identity. **Multi-lingual** The Bat! is available in many languages. **Customizable Descriptions** Several easy-to-use panels, sophisticated routing and included auto-placements, customizable headers and footers, as well as a powerful

search engine - everything just appears as you want it to.

Mailbox Management Our software comes with a full-featured mailbox management system. You can create folder structures for your mail, add labels for mail sorting and manage contacts, too.

Advanced Search The Bat! provides a quick search option with the included search engine. It is simple to use, easy to learn and powerful as well.

Built-in Address Book Has a built-in address book that will save you time and trouble. Your contacts will be automatically imported into the system.

Automatically Lock Screen Windows allows you to automatically lock the screen when your computer goes into sleep mode.

Email Notification Notify by e-mail is an email notification that runs in the background and allows you to rest assured that you have not missed anything.

Scheduling Schedule emails by date, hour or even day of the week.

Event Reminder Set reminders about upcoming events, such as birthdays, anniversaries, workdays or any other day and time that is pertinent to you.

Non-stop email Sending is a quick and easy way to send hundreds of emails to your recipient at once.

What's New in the The Bat! Professional Edition?

The Bat! is a full-featured e-mail client dedicated to e-mail managing. It is a universal product, able to work seamlessly on both Windows and Mac. The software allows you to organize your incoming and outgoing messages into Explorer-like folders for fast access. The Bat! supports multilingual editing. It allows you to read your messages in preview mode, manage your contacts, e-mail signature, identify large

attachments and use the built-in spell checker. The e-mail client can set rules to activate a customized reminder on messages you want to remember. It can avoid duplicates, create reusable templates for fast repetitive tasks and enable message splitting. With the option to use MAPI, POP3, IMAP4 and SMTP protocols, The Bat! is equally friendly to Windows and Mac OS X users. The application is fully customizable. You can fully control your tabs and interface style. The proprietary e-mail encryption and authentication protocol allows you to maintain complete privacy on your online accounts. The system is able to keep your account secure by using advanced password management features, such as a personal or hardware token, while the built-in biometric authentication allows you to access your account even without your token.
