I really like this app and I found it to work just great. I have no complaints at all and the only thing I would like to see change is the ability to adjust volume when recording. I had a problem with my mic not recording so I tried to adjust the volume and it just wouldn't adjust it at all.

Other than that it's all great.
Thanks to the developers. Best
app ★★★★★ Angel777
06/24/2017 This app is amazing
and this is the only app that I use
to record my voice for my
weekly podcasts. It's amazing.
I've had 3 recordings that I've
used for my podcasts that were
much better than any of the
other apps. The features are
great and the app is simple to
use. I really can't think of
anything else to say about this

app. Sweet ★★★★★ Cesttra

Click the big play button to hear the audio track, then click the drag the slider using your mouse pointer to increase (move up) or decrease (move down) the pitch.

While making this adjustment, BeeGee Me shows the level, ranging from Ultra Low, Barry White, Lowered and Normal (right in the middle), to Raised, Bee Gees, Chipmunks and Insane.
