settings files? I'm running Visual Studio 2008 and I was wondering where the project settings files are now? Previously they were in: C:\Users\\Documents\Visual Studio 2008\Projects\{projectname} However, I changed my working directory to another location and now I can't find them. Any ideas? A: The VS2010 settings files are in a different location. The Location & Root for the VS2010 C# projects and VB projects is: %USERPROFILE%\Documents\Visual Studio 2010\Projects\{projectname}\Config By default, the config directory is %UserProfile%\Documents\Visual Studio 2010\Projects\. That should tell you where to look to find the files. Q: Is programmatic way to authenticate a user using SAML? I am working in an application where I will have to require

that user have to authenticate against some external website (IdP) to login my application. I have gone through most of the articles on the net and it seems like I have to use Java Card, SPs and IdPs to achieve the requirement. But if we move towards an all Java environment, it seems like we can pretty much have to do in-house and not have to use the third-party tools that are definitely not going to support the domain/application. So my question is - Is there a way to implement the authentication with SAML from the very code? A: WSO2 Identity Server can be used for this. It has an SSO service. You can 3da54e8ca3
