

CA PCWatcher Pro 2009 is a freeware software application that comes packed with the ability to scan and remove malicious browser toolbars, which is a major threat for users. The most annoying problem of your computer is the malicious browser toolbars that slow down your work and make you surf the Internet with unnecessary disruptions. Today, we can find two types of harmful browser toolbars on the Internet: the first one is an active spyware that record every your keystrokes and send them to unknown databases. The second one is a passive spyware that record your activities on the Internet. CA PCWatcher Pro 2009 comes packed with a feature to combat both of these annoying browser toolbars in a convenient and easy way. It helps you to eliminate browser toolbars by automatically scanning the system registry and the web browser directories, cleaning malicious files, and removing the currently installed toolbars. You can also prevent the installation of new malicious browser toolbars and modify your browser settings on the fly. Besides, it comes with a handy user interface that makes easy the operations and quickly provides the necessary information about detected browser toolbars. What's more, it enables you to block the active spyware's installation, block the web addresses where potentially infected sites can be downloaded, display notifications, schedule scans, set the number of scans you want to conduct, and more. All these features and more make CA PCWatcher Pro 2009 one of the most complete and innovative utilities of its kind. CA PCWatcher Pro 2009 includes features that make it one of the most useful tools for the end user:

- Blocks browser toolbars and potentially unsafe sites with ease
- Scans and deletes potentially harmful files from the system and web browser directories
- Detects the malicious browser toolbars and removes them automatically
- Quickly scans and removes malicious files with the system registry and the web browser directories
- Detects and eliminates the malicious browser toolbars as they are
- Provides useful information about detected threats
- Quickly manages your browser settings
- Schedules regular scans
- Quickly notifies users about potentially infected files, URLs and sites
- Autofills the user name and password
- Displays the malicious browser toolbars and the date on which they were installed
- Blocks the malicious browser toolbars' website
- Includes a handy user interface and a clean and stylish design

CA PCWatcher Pro 2009 Description: Internet Help Desk is an easy-to-

1. Anti-Spyware detects and removes spyware, adware, cookies, and other suspicious data on your computer that might compromise your security. It is compatible with most of the latest viruses, spyware, and adware. 2. Because it's protected by a large anti-virus engine, you can simply install it and let it take care of all the security issues on your system. 3. Anti-Spyware works in the background so you don't have to worry about keeping your computer running. 4. It can scan all the files and folders on your computer, even files and folders in your My Documents. 5. Anti-Spyware also automatically closes all the windows (including the browser), when the scanning is completed. 6. Anti-Spyware has an easy-to-use graphical interface that provides user-friendly functionality. 7. You can scan multiple items at a time by choosing from three levels of scan options: • Scan all users • Scan on startup • Scan specific item 8. You can schedule the scan to run automatically when you log on or when the PC is restarted. 9. Anti-Spyware supports proxy auto-configuration. 10. Anti-Spyware gives you a weekly or monthly scan report that shows you how many spyware items are on your computer and where they are located. 11. Anti-Spyware can even export the spyware report to a text file, which you can easily share with your technical support. 12. Anti-Spyware has an easy-to-use interface that gives you quick access to anti-spyware tools. 13. It has simple and intuitive graphical user interface (GUI). 14. It can scan the active window or the entire computer. 15. Anti-Spyware can be run from CD or from a floppy disk. 16. Anti-Spyware has an advanced engine that detects spyware, adware, cookies, and other suspicious data on your computer that might compromise your security. 17. It's compatible with the most recent spyware, adware and viruses. 18. Anti-Spyware also automatically closes all the windows, including the browser, when the scanning is completed. 19. Anti-Spyware supports proxy auto-configuration. 20. Anti-Spyware has an easy-to-use graphical interface that gives you quick access to anti-

What's New In CA Anti-Spyware 2009?

- Protects your computer against spyware

CyberAdviser Anti-Spyware 2009 [New] provides users with intuitive user interface and a set of useful tools for detecting and removing potentially harmful, suspicious, and malicious files, registry keys, and Windows programs. The utility can protect your PC by scanning it on start-up and keeping a log of all of the items that are cleaned or quarantined. CyberAdviser Anti-Spyware 2009 has a simple interface that allows you to:

- Remove any files that your Windows operating system attempts to automatically restore after you remove a rogue application
- Add, delete, and update

your quarantine list • Set a schedule for your scan • Set your PC to automatically find and cleanup malware CyberAdviser Anti-Spyware 2009 [New] also enables you to: • Play a sound and display a dialog box to warn you about an unclean PC • Display error messages, unsaved files, and quarantined items • Delete or quarantine cookies • Play a sound when an update is available • Move junk files and other items to quarantine -

Removal process of the file: - On the first launch of the program, you are prompted to choose whether or not you want to import the quarantine list to your computer's registry - If you choose to import the quarantine list, the program will open up a blank file for you to type in the name of a file that you want to quarantine for later deletion - You can choose to select either the date or the time when you want the program to scan your computer's registry to determine if the specific file is already there - After the scanning process is complete, the program will quarantine the file for you - Quarantining process of the file: - From within the program's interface, you can choose
