Globally, SMS Marketing is the fastest growing form of marketing today. It's exciting to see the

numbers of users in the mobile phone category grow at such a tremendous rate. Most of us have at some point considered sending a text-message, and using 'push-notifications' to their friends on a regular basis. The benefits are clear; you can reach a much larger target audience, more quickly, more directly. So, in this article, we'll cover some of the best ways to make the most out of your mobile message marketing. What are the pros and cons of SMS

marketing? The biggest advantage of SMS marketing is that it is relatively inexpensive. The average cost of sending a text-message is equivalent to about \$0.40, and with at least 50% of mobile users in the U.S. able to receive messages, you can reach a fair number of people. This is also a great way to reach people who would have never heard of your brand otherwise. The catch? You may not be able to reach everyone; depending on your specific message, you will have to

make a few compromises. It can be difficult to communicate complex ideas, or purely entertain, in just a few hundred characters. Tips on how to increase engagement with your SMS campaign You may not have the budget of a large corporation, so there are still ways to gain better engagement with your mobile messages. First, start with simple messages, like specials or new sales. Think of an ideal message for a customer, and build your content around that. This will

be more enticing and will help your messages stand out in your readers' minds. Then, make your message really easy to read. Photos are a great way to bring life to text. They are also a great way to display your company's brand. To get more engagements and better message performance, you should also use a message alert system. This will allow you to send the same text-message more than once, and it will allow you to send the message at a regular interval

as well as at random. By doing this, you will encourage your customers to respond and engage, which will bring the number of responses and engagements up.

Advantages of SMS Text Messaging

There is no question that SMS is here to stay, and there are plenty of reasons to use it to communicate with your customers. Here are some of the biggest reasons why you should use SMS Marketing:

- Low Cost
