===== We pride ourselves in creating the best graphics and gameplay in our games. We are a game development studio that has been creating critically acclaimed RPG and adventure games since the year of 2000. We love to create fun and interesting games for people of all ages. Our mission is to create great games in a fun and friendly environment. Mages Defense is an easy and casual game for all ages and skill levels. In Games-Mage Defense you're a Mage who has to defend the crystal. The game is a tower defense game with a lot of interesting features. Its gameplay is very straightforward so it won't take you long to get the hang of it. There are many enemies like: Vampires, Wizards, Pirates, Witches, Orcs, etc. They can be easily shot down or slowed down by your traps. You have to choose which trap you are going to use on which enemy. Mages Defense is going to have many new features coming up in the near future. A mage has the strategy to defeat the hostiles, the wisdom to lead the armies, and the courage to intimidate their enemies. A mage sees what nobody can see, he foresees all the futures possibles. A mage fights in the dark of the night, in the wind of the storm, in the cold of the winter. A mage is where he needs it! Mages Defense is a third-person strategic adventure game set in a fantasy world with tower defense elements whose main goal is to defend the crystal from waves of enemies by setting deadly traps in their path and using the power of the mages to stop them. Defend more than 30 kingdoms from these creatures like evil mages, dragons, orcs, witches, ghosts, wizards, trolls, pirates, skeletons, zombies, vampires, and much more. All of them aiming to destroy everyone and conquer the world. Unlock different traps to help you in your journey and use them to defeat the waves of enemies. The more enemies you kill, the more summoning power you'll have to buy traps! Traps are a need to prevent enemies from reaching the crystal. Buying time and stopping enemies are priorities in this game. Before starting the waves, the player can see what kind of enemies are going to come and select the best traps for the battle. Many different traps allow different setups. Some of the traps can let the enemy slow or stop the enemy entirely. Other traps are going to explode them! Burn, shoot, freeze, explode, bite, slow them down.

in the Brotherhood's Diplomacy with Washington A top Brotherhood leader tells me the movement has been left with no choice but to alienate itself in order to seem moderate... Mohamed El-Beltagy, a strategist and Egypt political analyst, is a former senior member of the Brotherhood's Freedom and Justice Party. Mohamed El-Beltagy, a strategist and Egypt political analyst, is a former senior member of the Brotherhood's Freedom and Justice Party. (Pablo Martinez Monsivais / Associated Press) Karen DeYoung - April 9, 2013 In Spring 2011, as Egypt teetered on the brink of revolution, there was probably no question whose side the Brotherhood would be on. With the army in power, the Muslim Brotherhood had been a bulwark of stability for years. In 1934, the year of its inception, it had won nearly one-third of parliamentary seats in a popular vote for the presidency, which it alone had won. But not long after the revolution that came to be called the Jan. 25 "revolution" began, that had begun to change as it became more clear that the army's leadership was going to have a very different mandate than that to which most Egyptians had grown accustomed. When the elected Constituent Assembly drafted a Constitution for Egypt in December 2011, it revealed a very different country than the one that had been running it for more than two years. What had been a consensus of government, even of the Islamists, had been upset. Both the Brotherhood, the most powerful Islamist group, and the outside experts that represented Egypt to the world were unprepared for how profoundly they had been thrown off balance. The challenge to the Islamists emerged at the very moment, after the fall of Hosni Mubarak, when Ahmed Sha'rawi, the Brotherhood's political strategist, and his top deputies were exhausting all means for urging the Islamist party to accept the growing authority of the army. Instead, they urged the Brotherhood to step back from that possible, bloody confrontation. The strategy finally was embraced on Feb. 7, 2012, when President Mohammed Morsi issued a constitutional declaration preserving most of Mubarak's Constitution. Morsi's gambit did not work, and it ended with his removal by the military a month later. In the backlash that followed, Brotherhood membership dropped precipitously, though the government continued to call it by that name for a time after the overthrow of Morsi, and by others as well. President Mohamed Morsi's removal from office sparked
