For example, if you are working with a high-resolution print that you do not want to permanently alter or alter a specific portion of it, you can save the image as a PSD file, come back to it later when you want to work on it further, and then reopen the file and continue working on it as you see fit. During cell migration, actin filaments (F-actin) function as a molecular "railway track" to support the movement of the cell body. Moreover, Rho and its downstream effector Rho-associated protein kinase (ROCK) play an important role in actin polymerization. On the other hand, ROCK is known to promote actin stress fibers, which are key components in cell migration, by inhibiting the formation of cortical actin, and thus may have important implications in human diseases. Here, we show that blocking of Rho/ROCK signaling either by expression of a dominant-negative ROCK (myr-ROCK) or by a ROCK inhibitor, Y27632, significantly decreases the migration and invasion of cancer cells in vitro. Similarly, myr-ROCK-expressing cells have an impaired morphology and are less migratory, supporting the hypothesis that Rho/ROCK inhibits cell migration by altering actin cytoskeletal architecture. These data reveal a novel role of the Rho/ROCK pathway as an important negative regulator of the actin polymerization required for directional motility of cells.Blueprint for a Coming Revolution Blueprint for a Coming Revolution is a non-fiction book about the rise of Nazism in Germany and Europe, from the First World War to the rise of Adolf Hitler.
