hes (Book 1) Pub. Date: Oct 2014 Nexus is a society living under the rule of the Tribunal, a death cult, founded upon the belief that it is impossible to sin against the Tribunal and thus they must make up for the fact that their former society is in no way perfect. The group with increased focus on evangelization and the belief that they are on a mission to be set free from the bonds that used to hold them, and gradually educate the people they meet into their belief system. In this world, there is no duty, no fear, and no shame. *Missing Information Who are you? What are you? Why are you? Where are you going? Who are your family members? Why do you fear family members? Who are your friends? Why are they with you? Do you ever wish you were anywhere besides here? Why? The area these travelers are in is known as the Boardwalk. There are currently at the current time four settlements in this area, three ones run by the Tribunal and one that was originally independent. The Tribunal is also a civilization that views themselves as a 'religion' and does not believe in things like sin, sinning, sinned, sin. There are three daily meals that satisfy the simplest of needs in the region. A pasty, a roll, and a piece of fruit. The travelers travel to the west and east and on the east side of the Boardwalk in particular, the local section, people's first impression is to assume them to be travelers. Cloth pieces sewn together with thread, are the majority of the dress people wear in this region, but those who can afford it wear 'jumpsuits' in a variety of colors, all made with a tight fitting fabric that feels supple and form fitting to the skin. Over a certain population level, a group is determined by the presence of a clothing piece known as a tunic, generally black in color. The color? The dye is applied to the tunic by an 'injector' that is in contact with the the skin. In doing this, the skin becomes a medium for the colors applied through the dye. The average age in the region is between twenty-nine and forty-two years old. Contrary to humans, crossbreeds exist in the Marshes. These

Princess Aurora received a mysterious box, which was delivered to her. But before she opened it, her father ordered her to go with her new knight and learn how to care for the kingdom. The doors of the castle will be closed forever behind her, but before that, she promises to visit her family for a very short time. She found in the box a key, which can open the castle's doors for her. But now she is so upset with herself, she is so weak that she cannot find the key. Help her find the key and rescue her princess! What can you say about this game? HEROES is a fighting game based on the Greek myth. Athena is a big headstrong girl who must foil the plan of her would-be lover Dionysus, who is of course half the god of wine. Her mission is to get to Olympus but in the process she ends up being a goddess to her mortal allies. Athena's skills are all fighting-based, from a simple hit-enemys combo attack, to a variety of rolls and long-range attacks. They use enhanced versions of the equipment they have for attack. Athena also makes use of her tri-staff, so it's not just bam-bam-boom-boom-boom, there are intricacies with it. There are three modes of play with each one depicting the goddess at a different point in her quest. Initially she's just getting started, but as the series goes on she gets bolder and more daring, it's another great fighting game from Studio LineUp. Heroes is the first of the two projects which fans of the fighting genre will get from the developer (the other one being the sequel Nitroplus: Spirits of Wonder), but it only focuses on the two leads Athena and Dionysus, the others don't even have a name. If you're a fan of PlayStation exclusive action-fighting games, you'll definitely enjoy the first title in the series. 6 Chapters are currently available for you to play. Each chapter takes Athena and Dionysus on a journey to challenge the Gorgon Medusa. The first 4 chapters are on the mythological plane (where Athena came from), the last chapter takes place on the celtic plane, where Athena has many new items and weapons at her disposal. In the last chapter we also have the first boss, a destructive god from Olympus. The bosses are kind of a system, since
