Elden Ring Features Key:

Immerse yourself in a post-apocalyptic fantasy world. The Lands Between are a world of living legends, but their shadowy and dangerous land of shadows. Born from the failure of the "Elden Child" and a system whereby one who wields the power of life and death essentially controls the lands, the Lands Between are the battlegrounds where heroes and villains fight for the ultimate power. From the fields to the grand forests to the thrilling mountains, every corner of the Lands Between can be a stage for a thrilling battle. Every enemy that crosses your path will be immersed in a war of strength and cunning, and the heroes you meet on the way will help you play the situation out.

Create the personality of an Elden Lord and build your own adventure. A brand new story unfolds where players train their characters up to three times with frequent main story events. With existing content divided into tiers, each tier offers a potential leveling experience where players will require a certain amount of time and play to be able to achieve. Along with main story events, players will also be able to visit villages, trade, form a party, fight bosses, and enjoy a competitive system where players can work together.

A cyberpunk-style open-world battle system. In contrast to typical RPG battle systems, the face-to-face battles of the Lands Between do not rely on weapon accuracy and have a unique set of moves and evasions. Vast open environments allow you to freely move around and use the environment. When you fight, attack and block will appear in your field of vision, allowing you to directly execute combos and environmental effects while dodging attacks from your enemies at the same time.

When combined with items, your equipment may become more powerful. There will be various styles of equipment whose power will drastically change your play style! ■ NEW CHARACTER ATTACK SYSTEM Damage increased by the amount of weapon and armor you equip One of the outstanding characteristics of the new game is the new attack system! When you attack by the new attack system, the attack power of the weapon and the armor you wear increases, and the damage you deal increases. The amount of damage you deal increases based on the number of attacks you make consecutively. The number of attacks you can make is determined by your weapon and armor skills, as well as by the weapon and armor that you equipped. At the start of battle, you can determine your attack pattern by placing your equipped weapons on the area designated in the screen, and when you attack, a certain amount of charge will be accumulated. When you use your special skill in battle, a certain amount of charge will be accumulated. You can use charge to increase the number of attacks you can make consecutively. Charge is lost while in battle. In addition to this, the new game has a new system that can increase your ability to use special attacks even after you lose it. Even after losing your special attack, if you have a skill for a weapon you have equipped, you can use that weapon's skill to deal increased damage. In addition to this, the new game will have a system where you will be able to use your special skill even after you lose your charge. The more charge you have, the more likely you are to use that special skill. HOW IT WORKS
