Programming languages AutoLISP AutoLISP is an application programming language with the syntax similar to LISP. AutoLISP was originally developed in 1980, by Tom Perkins and Bob Fulkerson at the University of California, Santa Barbara, as a general-purpose programming language. AutoLISP is similar to BASIC, APL, Scheme, or LISP. AutoLISP was originally targeted at CAD and architecture, but is now used in many other fields. AutoLisp is a program that transforms AutoCAD files into an AutoLISP script that is ready to be executed in AutoCAD. Visual LISP (VLS) Visual LISP (VLS) is an extension of the AutoLISP. It is supported by AutoCAD and is the one most widely used, because its capabilities are very similar to those of AutoLISP, but it has the advantage of not being a general-purpose language, but rather being suitable for a very specific task. Visual LISP provides hooks into the AutoCAD system, so that it can be used to write specific software for specific AutoCAD functions. VLS is used for CAD scripting. Visual LISP allows access to the same commands and functions as AutoLISP, but is restricted to specific commands. Visual LISP is also known by many other names such as AutoScript, Autoset, AutoLISP, Auto-LISP, AutoScript, QuickLISP, AutoCAD, and AutoScript. Documentation The AutoCAD User's Guide () is the primary source of AutoCAD documentation. It covers all aspects of AutoCAD, including functionality, commands and operators, and includes the Help system. AutoCAD itself was originally developed by Bruno de Bruin and co-developed with Michel Mieg (de Bruin) and Bruno de Bruin, Michel Mieg and Ian Johnson (Johnson). In 1992, Michel Mieg and Bruno de Bruin created the Expressions and Editors group, now known as Graphics Tools, to write the online Help system for AutoCAD, and the script system. AutoCAD has three on-line help applications, including the help system and two user's guides. The online Help system was an extension of the Help system, and has since been extended by AutoLISP programming and user's guides. The user's guides ca3bfb1094
