“The world-class engine that we are using in FIFA 19 was a great foundation to start the next iteration of FIFA,” said senior producer Jay Groulx. “This new engine is built from the same gameplay foundations as FIFA 19, but the engine is more powerful and provides players with more flexibility than any previous FIFA game.” Football 360 in FIFA 22 introduces an all-new feature called Mission Editor. Based on the same technology as EA SPORTS™ FIFA 18 Ultimate Team™, this tool allows players to create their own custom-built matches using Squad Battles. Teammates can be created using in-game characters, and will participate in pre-game and post-game briefings. Customisable attributes make each player unique, encouraging players to personalise their gameplay and experiences. New difficulty modes such as F2P Pro Evolution Soccer 2019, Pro-Am and various European leagues are also available, and online features such as Online Kits, Online Friendlies, Online Seasons and Online Leagues are enhanced. FIFA 22 is available now on PlayStation4, Xbox One, Nintendo Switch and PC.
