Designed with digital art as a central topic, the book is intended to depict the world through the eyes of the artist. It is exclusively available on the Intarweb right here. If you are a DLUG or Intarweb user, I'd really like to hear your comments as well as any criticisms. I think the book covers enough ground for acclimation here on the Decodart Archives, but if there is something that you find unsatisfactory, I can rework the index.

Thanks for your attention to this project. I'm not sure I see how this project has anything to do with art or art galleries. "Art" is a proper noun and "art" is a mass noun, not "artistic expression." An "art object" is a piece of art that has an aesthetic expression, but a "piece of art" is not necessarily an art object. Objects are things, otherwise known as "crap." The first definition of art on Merriam-Webster's Collegiate Dictionary is "skill in using artistic ability for bodily or intellectual ends." Per Wiki, "Art is often defined as the skill of using the creative power of one's mind in the service of technical competence" and "The formal aspects of art pertain to definition and method as well as to medium. The art of a widely-accepted technical medium is now usually taken to be the skill and craft of the artists working within that medium and the discipline that supports that art." Seems like some art as "art" vs. "art as art". (Needless to say, art and art galleries have their own definitions and are not the same thing, but I think that this should be a starting point.) "We've got to face the fact that magic doesn't exist," the carpenter told me, as I helped him cut down a tree. "The way I see it, we've had it too easy too long. Easy to live. So now it's time for you and me to hit the road and face some reality. "'Cause what we've got," he continued, "is a choice between reality and fantasy. And you've got to make up your mind which one you're gonna live with." -Terry Pratchett, Going Postal I can't begin to cover all of the finer details (some
