History AutoCAD was originally developed by Autodesk. It was first released in 1987. In 1992, the original code was ported to Pascal and renamed MicroStation. In 1996, the version 2.5 was released. Autodesk acquired MicroStation, and renamed it to AutoCAD. MicroStation MicroStation was originally developed by a team at Petrofac, lead by Paul Starkey. After merging with International Computers Ltd in 1994, the product was rebranded to MicroStation. The team that developed the original AutoCAD were not hired by Autodesk. This led to the development of AutoCAD being split into two teams. The original AutoCAD team worked on the then AutoCAD 2.5 which was renamed as MicroStation. The new MicroStation team worked on AutoCAD 2000 and later on AutoCAD LT. AutoCAD was finally released as a stand-alone product. A few years later MicroStation was merged into AutoCAD again. AutoLISP The same team that developed AutoCAD was hired by Autodesk to create a similar product for 3D. This product became known as Visual LISP. In 2010, the AutoLISP product was merged into AutoCAD. Visual LISP Visual LISP (VLISP) is a type of a LISP.
