Low in Canada (Living Stereo), God Bless the Girl in Canada (Living Stereo), And Tomorrow Never Knows in Germany (SBKL&BKW,.1. Field of the Invention The present invention relates to a vehicle air conditioning device for controlling the temperature of the passenger compartment when the load of the vehicle is changed. 2. Description of the Related Art A typical air conditioning device for a vehicle is arranged to move the passenger compartment cooling coil in the vehicle compartment to some extent depending on the load of the vehicle as disclosed in Japanese Unexamined Patent Publication No. 59-207388. This type of air conditioning device is designed such that, when the load of the vehicle is small (e.g., when the vehicle is being driven at a low speed), the cooling coil is moved towards the rear of the vehicle compartment so as to increase the amount of flow of air and the temperature of the air that is blown in the passenger compartment. When the load of the vehicle is large (e.g., when the vehicle is driving at a high speed), the cooling coil is moved towards the front of the vehicle compartment so as to decrease the amount of flow of air and the temperature of the air that is blown into the passenger compartment. In this type of air conditioning device for vehicles, the amount of flow of air and the temperature of the air that is blown into the passenger compartment depend on only the position of the cooling coil in the vehicle compartment. Therefore, if the position of the cooling coil is not properly controlled when the load of the vehicle is changed, the amount of flow of air and the temperature of the air that is blown into the passenger compartment will be changed in a manner which is contrary to the change in the load of the vehicle. As a result, the temperature distribution in the vehicle compartment which is well-cooled at low speed will become nonuniform at high speed.1990 Australian Open – Men's Singles Qualifying This article displays the qualifying draw for men's singles at the 1990 Australian Open.
