Download Bitdefender Antivirus Plus 2015 Latest Version. Get free software updates and a best protection for all your devices from any cyber threat with Kaspersky Internet Security. It's fast and easy to download, install and go!. Try Kaspersky Internet Security for free. What is the reason why McAfee does not have. McAfee does not have the money to create a full tool, and they've already been into the free/trial space and seen a lack of continued growth, so I'm guessing that's the outcome. It's still a great tool for basic protection. Is Kaspersky antivirus good for routers? Nothing is 100%, so if your router does have vulnerabilities, they could be easily exploited by a virus. It's more than likely that McAfee does everything they can to insure a virus can't open a port on a router to infect their devices. Is Bitdefender good? I'd get a free trial and see for yourself. They all have pros and cons. I do recommend looking at their "download center" section if

In this article we will discuss how you can enable or disable an internet connection sharing in Windows 10 using NetSharing on Windows 10 Pro/Enterprise. Under Networking, you will see an option called "Internet Connection Sharing". Here you can enable or disable it and it can be managed easily with an app called Connectify Hotspot Shield (Mac) (Windows 8 / Windows 7). If you are looking to share your home broadband connection, this option can provide you the same functionality. Here I will discuss enabling or disabling the Internet Connection Sharing (ICS). Enabling internet connection sharing in Windows 10 Open the Charms bar, type "Network and Sharing center", click on the Network and Sharing Center. Click on "Change Adapter Settings" option. If your ISP has chosen to enable this option for a particular adapter and a mobile broadband connection is available, then a virtual network adapter named "Broadband Internet Connection Sharing" will appear in the list. This adapter lets you share your broadband internet connection with other computers connected to the same router (or other devices which are connected to the router). This is a virtual adapter which can be managed in the same way as other adapters. How to disable internet connection sharing in Windows 10 Open the Charms bar, type "Network and Sharing Center", click on "Change Adapter Settings" option. If there is a virtual network adapter named "Broadband Internet Connection Sharing" or "WLAN internet connection sharing", disable it. How to enable internet connection sharing in Windows 10 Open the Charms bar, type "Network and Sharing Center", click on "Change Adapter Settings" option. If there is no virtual network adapter named "Broadband Internet Connection Sharing" or "WLAN internet connection sharing", create one. Total changes Using the above methods, you can enable or disable internet connection sharing on Windows 10 easily.
