You have caught the current rare issue. The solution is very simple, since the program passed all of the checks and also worked for others. That means that the problem was actually the same version of the reCAP PLUS that you used. This is the problem that I have found in the whole past versions of the package. But the PYTHON check worked! The problem was caused that the reCAP PLUS was not actually any zip file, which included the download link (see screenshots below) We have had to give up our developer support because we have found out that it is much easier for us to do this than to spend time and money on the support. The google is always more profitable, and the solution of the problem is always the same. We have had no reports of the package not working. It is already released as of 01.07.2010. It has been made available for others too. The version is 0.0.1. I've forgotten to add the download link. We are sorry for any inconvenience caused and we hope that you understand. This is a third-party software and therefore we are not able to assist directly with this issue. However, if you have any other issues with this product, please feel free to report them at support@iluk1.com. You are using official Package version you should to www.iluk1.com to download it or go to the main page of the product. For anyone who is not techy, remember that the support from ILUK1 is free and genuine. There is no time for consulting. To see the list of software which is currently supported by ILUK1, as well as the list of the newest supported software click here. You can either do it manually or get a clean copy. Choose one, I would recommend the former. Alcatel Timos 13 0 R4.rar Alcatel Timos 13 0
