---

Submit malware for free analysis with Falcon Sandbox and Hybrid Analysis technology. Hybrid Analysis develops and licenses analysis tools to combat malware. Once infected, we place it in our lab for analysis. If we find malicious functionality in it, we mark it as malware and can offer to remove it. This allows us to inspect the malware for malicious functionality and identify ways to remove it. Alternatively, if we cannot identify the malware, we mark it as "unknown malware" so that we can do penetration testing in the future.
